Collection 2024-2025

“Admiral ”

The power of Water,
The luxury of Life

ADMIRAL

2025

Quality of Admiral

Admiral bathtubs and shower trays are produced by 4mm - 6mm thick acrylic sheets, depending on internal depth need of the finished product. In order to strengthen the acrylic body, we are using 18mm 1st quality chipboards under to base body, corners and edges and covering them with thick polyester-glass fiber layer.

The panels of the bathtubs and shower trays are strengthened with glass fiber and polyester as well.

In order to prevent possible side wall bending which might arise on monoblock products during showering, the bodies are strengthened with moisture resistant precast concrete panels.

Profiles used for the bathtub legs are stainless steel 304 . They are welded depending on the shape of the bathtub. The weight of the bathtub and showertray is equally and safely distributed on the legs.

کیفیت آدمیرال

زیردوشی ، وان و جکوزی آدمیرال بسته به نیاز و فضای توسط ورق های اکریلیک با ضخامت ۴ میل و ۶ میل تولید می شود. به منظور استحکام بخشیدن به بدنه اکریلیک از نئوپان با کیفیت در زیر بدنه و گوشه ها و لبه ها استفاده می کنیم و آنها را با لایه ضخیم الیاف پلی استر شیشه می پوشانیم.

تمام وانها و زیردوشی ها نیز با الیاف شیشه تقویت شده است.

به منظور جلوگیری از خم شدن احتمالی دیوارهای جانبی که ممکن است در محصولات مونوبلوک در هنگام دوش گرفتن ایجاد شود ، بدنه ها با پانل های بتنی پیش ساخته مقاوم در برابر رطوبت تقویت می شوند.

پروفیل های مورد استفاده در پایه های وان و زیردوشی ها از جنس استنلس استیل و بسته به نوع وان و زیردوشی طراحی می شوند . وزن زیردوشی و وانها به طور مساوی و ایمن بین پایه ها توزیع می شود.
